

# VOYAGER/HAIPE

VoyagerHAIPE Brackets provide easy mounting for HAIPE encryption devices to any Voyager network module with a Voyager 1 Chassis attached. The VoyagerHAIPE bracket secures the encryption device to the Voyager network module. The entire secure network enclave can then easily slide into a Voyager chassis such as Voyager 8 , Voyager 8+ and Voyager 2.

## OPTIONS

- VoyagerHAIPE for ViaSat KG-250X
- VoyagerHAIPE for ViaSat KG-250XS
- Voyager175-N

Portable

Rugged

Low Power
