

Voyager 2-S Fly Away Case

The Voyager 2-S fly away case is a wheeled, rugged, and weatherproof airline sized carry-on transit case that supports a Voyager 2-S (two slot) chassis.

The transit case has a fixed power inlet and space to power up to two standard sized Voyager modules alongside other small form-factor modules such as HAIPE.

KEY FEATURES

- Supports the Voyager 2-S chassis carrying two standard sized Voyager modules with Voyager 1+ UPS attached
- Surface mount enclosure for small form-factor devices mounted with Voyager HAIPE brackets
- Isolated enclosure for the AC power inlet with fan assisted cooling and DC power distribution
- Removable side panels and hinged lid for ease of access to Voyager modules and power cycling
- Impact-resistant injected moulded case with quiet-glide wheels and retractable pull-handle

Voyager 2-S Fly Away Case

Specifications
